### REGULATIONS LIBRARY

LIBRARY REGULATIONS

(a) Books, periodicals and pamphlets may be borrowed by Fellows, Members, Licentiate Members, Associates and Affiliates personally or by a messenger producing a written order. The person to whom such publications are delivered shall sign a receipt for them in a book provided for that purpose.

(b) Publications may be borrowed through the post upon a written order. An acknowledgement of the receipt of such publications must be made on the form provided and returned to the Society immediately. Failing this, it will be assumed that the borrower has received the books, for which he will accordingly be held responsible. The postage of publications returned to the Society shall be defrayed by the borrower.

(c) A borrower may not have more than three publications in his possession at one time.

(d) A borrower will be considered liable for the value of any publication lost or damaged while on loan to him, and, if it be a single volume or part of a set, for the value of the whole work thereby rendered imperfect. Marking or writing in the publications is not permitted, and borrowers are requested to call attention to damage of this character.

(e) Books and pamphlets may be retained for twenty-eight days. Periodicals may be retained for fourteen days. Applications for extension of the loan period cannot be extended without application being made to the Secretary of the Society whose decision in this matter must be accepted as final and binding.

(f) Books and pamphlets added to the Library will not be

binding.

(f) Books and pamphlets added to the Library will not be lent until after the expiry of one month from the date received. The current number of a periodical may not be borrowed.

(g) Borrowers retaining publications longer than the time specified, and neglecting to return them when demanded, forfeit the right to borrow until they be returned, and for such further time as may be ordered by the Council.

Any borrower failing to comply with a request for the return of a publication shall be considered liable for the cost of replacing it, and the Council, may, after giving due notice to him, order it to be replaced at his expense.

No publication may be reissued to the same borrower until at least seven days have elapsed after its return, neither may it be transferred by one borrower to another.

(h) Publications may not be taken or sent out of the United Kingdom.

Kingdom. (i) Publications returned through the post must be securely

packed and adequately protected.

(j) Parcels should be addressed: THE LIBRARIAN,

26	Characteristics of Households and Dwellings in Local Areas	England and Wales, Regions, Conurbations, Urban/Rural Aggregates, Local Authority Areas, Conurbation Centres, New Towns	317

### Programme of Census Reports and other census information

The Census 1961, England and Wales, Preliminary Report, published in June, 1961, contains a general note on the taking of the census, some brief preliminary statistical commentary and provisional figures of the population, private households and private dwellings for all local authority areas (counties, boroughs, urban and rural districts) regions, conurbations and New Towns.

A series of County Reports, already published, contains the statistics of local interest which were collected on a 100 per cent basis. The subjects covered are population and acreages of local government areas; distribution of the local populations according to sex, age and marital condition; birthplace, citizenship and nationality; private households and their size distribution, the buildings, dwellings and rooms in which they live, the tenure of their accommodation and certain household arrangements possessed by them; institutions of different types, housing various categories of non-private population. This series does not contain any information which was collected on a 10 per cent sample basis and therefore does not include distributions of the population by terminal education age or by social class as were included in the corresponding series of the 1951 Census.

The Report on Scientific and Technological Qualifications gives statistics of persons with those qualifications and the occupations and industries in which they work. This report is on a 10 per cent sample basis and relates to Great Britain.

The Report on the Welsh Speaking Population gives statistics derived from the question about speaking the Welsh language addressed to those enumerated in Wales and Monmouthshire.

The Birthplace and Nationality tables comprise summaries of the information given in the County Reports on birthplace, citizenship and nationality.

The *Usual Residence* tables compare the enumerated census population in local areas with the population usually resident in those areas and also give the numbers enumerated who are usually resident outside England and Wales classified by country of usual residence and by age.

The Age, Marital Condition and General tables mainly comprise summaries of the information given in the County Reports on local populations, age and marital condition, with the various categories of non-private population.

The Housing tables, Parts I and II and the Household Composition tables will include summaries of the information on housing and private households given in the County Reports, together with more extensive tabulations for England and Wales. There will be tables of buildings, dwellings and households, tables of tenure and household arrangements and household composition tables. The latter will provide figures on the composition and the social and economic characteristics of households and families and the types of person included in these groups and will be on a 10 per cent sample basis.

The Migration tables will give statistics of the numbers and characteristics of people who changed their usual residence in the year before Census Day; details of their age, marital condition, socio-economic group, occupation and industry will be given together with similar information about the remainder of the population classified by the length of time they have lived at their present usual residence. Numbers of people moving will also be given for local areas with some details for larger areas. These tables will be on a 10 per cent sample basis.

The Workplace tables will show the population resident in one area and working in another, the units of area being boroughs, urban and rural districts and New Towns. This report will be on a 10 per cent sample basis.

The tables on Occupation will give statistics of the occupied population based on their personal occupation (classified according to the Classification of Occupations, 1960)\* including statistics for usually resident populations of the larger areas, and with reference to age, marital condition, employment status (manager, employer, etc.) and socio-economic group. These tables will be on a 10 per cent sample basis.

<sup>\*</sup> H.M. Stationery Office, 1960, price 27s 6d net.

The tables on *Industry* will give statistics of the occupied population based on the branch of economic activity to which their occupations contribute with identification of employment status categories, age-groups and married women, the branch of economic activity units being those of the *Standard Industrial Classificationt*. Statistics of local populations will be based on the area containing the place of work. These tables will also include an analysis of each important industry or group of industries showing the principal occupations which contribute to it. These tables will be on a 10 per cent sample basis.

The Education tables will give figures relating to the terminal education age of persons resident in local areas and, for England and Wales and the regions and conurbations, classifications by age and by occupation. These tables will be on a 10 per cent sample basis.

The Fertility tables will give statistics derived from the questions on date of marriage and number of children which were put to women who had ever been married.

The *Index of Place Names* will give the location and the census population of places with defined boundaries.

Commentaries. These will be compiled and published as soon as time permits. They will be included in the same volume as the tables where this can be done without delay, but in other cases reports on the tables will be issued at a later date. In addition there will be an administrative report on the census as a whole, and a statistical report on census methodology.

### Note

With regard to census information not presented in the published reports and tables referred to above, Section 4(2) of the Census Act, 1920, empowers the Registrar General, if he so thinks fit, at the request and cost of any local authority or person, to cause abstracts to be prepared containing any such statistical information, being information which is not contained in the census reports made by him, and which in his opinion it is reasonable for that authority or person to require, as can be derived from the census returns.

This provision is available to meet any special demand for census statistics of a greater degree of elaboration, whether in respect of subject matter or area, than those given in the official reports. In particular, provision has been made for the extraction during the processing of a selection of data for every ward in boroughs and urban districts and every civil parish in rural districts. This information is equivalent to the scale of publication for an area under 50,000 population as regards data collected on a 100 per cent basis and a more restricted selection of basic figures obtained on a 10 per cent sample basis. More details will be supplied on request.

<sup>†</sup> Revised edition, H.M. Stationery Office, 1958, price 2s 6d net.

### Local Housing Indices

### General Explanatory Notes

### General Note

This is the third of three volumes which together comprise the main 1961 Census statistics on housing. The three volumes are:-

Housing Tables Part I Buildings, Dwellings and Households
Housing Tables Part II Tenure and Household Arrangements
Housing Tables Part III Local Housing Indices

In addition there will be a commentary volume and the volumes on Household Composition (tables and commentary) the latter containing mostly 10 per cent sample statistics.

Housing Table 26 appears in this part and contains a set of local housing indices for each region, conurbation, urban/rural aggregate, local authority area, conurbation centre and New Town. The indices relate to the socio-econonic classification of the population in private households, the dwellings, households, density of occupation, household arrangements and household composition with respect to each area. The percentage changes since 1951 in the population in private households and the number of dwellings are shown. Columns b, c and d relating to the socio-economic classification and column af relating to households with more than one family are based on 10 per cent sample figures. All other figures are derived from the 100 per cent full count.

### DEFINITIONS

### Socio-economic Groups

The 13 socio-economic groups introduced in 1951 have been replaced by 17 somewhat differently derived socio-economic groups based on the census recommendation of the Conference of European Statisticians sponsored jointly by the Statistical Commission and Economic Commission for Europe\*.

Ideally each socio-economic group should contain people whose social, cultural and recreational standards and behaviour are similar. As it is not practicable to ask direct questions about these subjects in a population census, the allocation of occupied persons to socio-economic groups is determined by considering their employment status and occupation (and industry, though for practical purposes no direct reference is made since it is possible in Great Britain to use classification by occupation as a means of distinguishing effectively those engaged in agriculture).

The socio-economic groups with brief definitions are:

- (1) Employers and managers in central and local government, industry, commerce, etc. large establishments
  - Persons who employ others or generally plan and supervise in non-agricultural enterprises employing 25 or more persons.
- (2) Employers and managers in industry, commerce, etc. small establishments

  As in "(1)" but in establishments employing fewer than 25 persons.
- (3) Professional workers self-employed
  - Self-employed persons engaged in work normally requiring qualifications of university degree standard.

<sup>\*</sup> European Programme for National Population Censuses. United Nations (Conf. Eur. Stats. WG/6/81) Geneva, 1959.

### (4) Professional workers - employees

Employees engaged in work normally requiring qualifications of university degree standard.

### (5) Intermediate non-manual workers

Employees, not exercising general planning or supervisory powers, engaged in non-manual occupations ancillary to the professions but not normally requiring qualifications of university degree standard; persons engaged in artistic work and not employing others thereat; and persons engaged in occupations otherwise included in Group (6) who have an additional and formal supervisory function.

### (6) Junior non-manual workers

Employees, not exercising general planning or supervisory powers, engaged in clerical, sales and non-manual communications and security occupations, excluding those who have additional and formal supervisory functions.

### (7) Personal service workers

Employees engaged in service occupations caring for food, drink, clothing and other personal needs.

### (8) Foremen and supervisors - manual

Employees (other than managers) who formally and immediately supervise others engaged in manual occupations, whether or not themselves engaged in such occupations.

### (9) Skilled manual workers

Employees engaged in manual occupations which require considerable and specific skills.

### (10) Semi-skilled manual workers

Employees engaged in manual occupations which require slight but specific skills.

### (11) Unskilled manual workers

Other employees engaged in manual occupations.

### (12) Own account workers (other than professional)

Self-employed persons engaged in any trade, personal service or manual occupation not normally requiring training of university degree standard and having no employees other than family workers.

### (13) Farmers - employers and managers

Persons who own, rent or manage farms, market gardens or forests, employing people other than family workers in the work of the enterprise.

### (14) Farmers - own account

Persons who own or rent farms, market gardens or forests and having no employees other than family workers.

### (15) Agricultural workers

Employees engaged in tending crops, animals, game or forests, or operating agricultural or forestry machinery.

### (16) Members of armed forces

### (17) Indefinite

Persons with inadequately stated occupations.

Further details of the socio-economic groups in terms of the occupation and employment status groups are shown in the *Classification of Occupation*, 1960 (H.M.S.O. 1960).

In columns b, c and d these 17 socio-economic groups have been combined into three sets as an indication of the classification of the population of

- (i) Employers, managers and professional workers.
- (ii) Non-manual workers, foremen and supervisors, skilled manual workers and workers on their own account (other than professional).
- (iii) Others.

### Dwelling

The general definition of a dwelling was "a building or part of a building which provides structurally separate living quarters".

A dwelling was normally a private dwelling house, flat or maisonette built as such, with a front door of its own. Where houses or other buildings had been adapted to provide residential accommodation in smaller units, these smaller units were regarded as dwellings if they were structurally separate, i.e. if such a unit had a separate front door to the street and was self-contained (separated from the rest of the building by a wall or solid partition), it was counted as a dwelling. When access to such a unit was through part of the building, it was counted as a dwelling only if access to the main door was gained by means of a common staircase or landing. If it could only be reached through the quarters occupied or normally occupied by another household (including a hall) it was not counted as a dwelling. In order for such a unit to count as a dwelling it also had to be possible to move between its rooms internally without making use of the common staircase or landing. Normally there would only be one door of the unit opening on to the common internal part of the building (disregarding access to shop or office portions of the building).

A dwelling would usually have more than one living room in addition to kitchen and bathroom, but one-room flats were counted as dwellings if they met the conditions set out above, provided they had either a separate kitchenette, or a cooking stove in the room and a separate bathroom and watercloset.

Bed-sitting rooms (sometimes called one-room flatlets) were not counted as separate dwellings.

The whole of the quarters occupied or normally occupied by households (i.e. the household spaces) within any building had to be included in one or other of the dwellings within it. If the building was arranged in such a way that there was no reasonable way of dividing it into dwellings, the whole building was regarded as a single dwelling.

In a hotel, boarding house, hospital or other institution a private dwelling was identified only if it was occupied by a private household. Generally if such a dwelling was vacant or occupied by members of the institution not constituting a private household it was not counted but married quarters in defence establishments were usually counted as dwellings even if they were vacant. In an institution the provision for counting a unit as a dwelling only if it met certain conditions as to access was modified; private quarters were counted as a dwelling even though access was through the main institution, but not if access was through another private dwelling.

Dwellings have been classified into permanent and non-permanent dwellings. A non-permanent dwelling is a dwelling in a mobile or non-permanent structure of the type not counted as a building unless it was some person's usual residence on census night. All other dwellings have been classified as permanent.

### Occupied and vacant dwellings

A permanent dwelling was regarded as "occupied" if one or more households were enumerated in the dwelling or at the time of the census were usually resident in the dwelling although not present on census night. A permanent dwelling was regarded as "vacant" if no household was enumerated there on census night and if it was not the usual residence of any household.

### Comparison of definitions of "dwelling", 1951 AND 1961

In the 1951 Census the term dwelling included whole buildings or houses which were not sub-divided and also any structural sub-divisions where these latter were defined as "a portion of a house or building which has been structurally designed or adapted for use as a separate self-contained dwelling. Its distinctive feature is that it has a separate front door of its own, apart from the street door, if any, giving entrance to the house or building as a whole".

The instructions and examples given to enumerators in 1961 aimed in general at adding precision to the 1951 concept. The main specific changes were that

normally a dwelling had to have more than one living room in addition to the kitchen and bathroom and the instruction that bed-sitting rooms and some one-room flatlets were not to count as separate dwellings.

In 1951 separate dwellings were not identified in hotels, boarding houses, hospitals or other institutions. This is in contrast to the 1961 practice (see above). A particular example of this is the treatment of married quarters in defence establishments. In 1961 married quarters which met the conditions of being structurally separate were usually classified as dwellings. In 1951 any married quarters which were located within the boundary of the defence establishment would not have been counted as dwellings.

### Room

The count of rooms was obtained by the enumerator by verbal enquiry from the household. A room was defined to the enumerator as follows:-

"A room is any covered space surrounded by walls, doors, or windows and used by the household for living, eating or sleeping. Rooms available for these purposes but not actually in use e.g. unfurnished spare bedrooms, should be included.

Landings, lobbies, recesses, closets and bathrooms should not be counted as rooms, nor should store rooms, offices, warehouses, shops or any other rooms used for non-domestic purposes.

A kitchen, kitchenette or scullery should be counted if meals are regularly eaten there, otherwise it should not".

### Comparison of definition of "room", 1951 and 1961

The general purport of the definition of room which was used at the 1951 Census was the same as in 1961. In 1961, however, there was a specific instruction that rooms available for living, eating or sleeping but not actually in use should be included. The comparable section of the instructions in 1951 was "All rooms in which the household live, eat or sleep, including the kitchen if so used, should be counted, but a scullery (or kitchenette), landing, lobby, closet or bathroom should not normally be included". The lack of specific mention of unfurnished spare bedrooms, etc. may have led to their exclusion in 1951 and their inclusion in 1961. This may contribute to the small but widespread increases in the numbers of dwellings and household spaces with relatively large numbers of rooms.

### Private Household

A private household was defined to the enumerator as follows:-

"A household comprises one person living alone or a group of persons living together, partaking of meals prepared together and benefiting from a common housekeeping.

A person or persons living but not boarding with a household in a house, "flat, etc. should be treated as a separate household. But a person living with a household who usually has at least one main meal a day provided by that household while in residence is part of that household. (Breakfast counts as a meal for this purpose).

A household must have exclusive use of at least one room. If two people share one room and do not have exclusive use of at least one other room they should be treated as one household.  $^{\shortparallel}$ 

The rules for identifying a private household in a hotel, boarding house, hospital or other institution were in general the same as those given above except that a person or group was only treated as a private household if they were living in structurally separate quarters and were either

a family group doing much of their catering separately from the institution or  $% \left( 1\right) =\left( 1\right) +\left( 1\right) +\left($ 

a person or group who did not have any meals provided daily by the institution.

In 1951 private households which lived within the boundary of an institution were included as part of the population of the institution and not enumerated separately as they were in 1961, if they met the above conditions.

### Households sharing dwellings

Households which did not occupy the whole of the dwelling have been divided into two groups; those which had exclusive use of both a kitchen stove or range and a kitchen sink, and those households which did not have exclusive use of both facilities. The information to make this division was obtained by verbal enquiry by the enumerator who then made entries "E" (exclusive use) or "N" (not exclusive use) in the appropriate panel on the schedule.

### Non-private Household

Non-private households are excluded from this table.

"Non-private households" covers people who were enumerated in hotels, boarding houses and institutions or otherwise grouped in establishments with some functional purpose other than that of providing food or satisfying other domestic convenience. They include also people in defence establishments, ships at moorings or anchorage or on coastwise voyages, and a small miscellaneous element. A household classified by the enumerator as private was re-classified in the census office as non-private if the number of boarders or the number of inmates, patients or staff, etc., was five or more. In 1951, in doubtful cases all households with under ten people were treated as private. Where there were ten or more people in the group the household was treated as non-private if the number of boarders exceeded the number in the family of the head of the household. In 1961, if all the people who were enumerated in a non-permanent structure (hut, chalet, etc.) or in a mobile structure (caravan, houseboat, etc.) gave a usual residence elsewhere they were all transferred to the residual "other population" of non-private households. In some institutions there are private households having separate accommodation and catering, e.g. the medical superintendent of a hospital with his family, the headmaster of a school or a hotel mananger. These have been excluded from the non-private households to which they are attached and included with other private households; their accommodation has been included in the private dwellings. In 1951 they were included in the non-private population.

### Household Arrangements

For the question on household arrangements see Panel M on the schedule and Note 10 on the reverse of the schedule.

### Pensionable Age

Persons of pensionable age are men aged 65 and over and women aged 60 and over.

### Family

A family is defined as either a married couple and their never-married children if any or a lone parent with his or her never-married children. "Lone parent" means a married parent whose spouse does not reside in the same household and any single, widowed or divorced parent.

In the household composition tables from which column af is derived households include absent members and exclude visitors.

For further details see the volume of Household Composition Tables.

### SOURCES OF DERIVED FIGURES

The percentages and other ratios in Table 26 are derived from numbers in the following tables:-

Column	Description	Source of absolute numbers
b-d	Percentage of occupied and retired males in socio-economic groups	Occupation Tables Parts I and II, also the county leaflets on Occupation, Industry and Socio-economic Groups, Tables 28 and 29
f	Percentage change 1951-61 in population in private households	1951 County Reports, Table 3, except where boundary change has occurred
ħ	Percentage change 1951-61 in number of occupied and vacant dwellings	1951 Housing Report, Table 13, except where boundary change has occurred

### Sources of Derived Figures - continued

Column	Description	Source of absolute	e numbers
j	Percentage of occupied dwellings with 1-3 rooms	County Reports, Table 12	L
k	Rooms per occupied dwelling	County Reports, Table 12	L
m	Percentage of households occupying 1-3 rooms	County Reports, Table 13	3.
n .	Rooms occupied per household	County Reports, Table 13	3
0-r	Percentage of households with stated number of rooms	County Reports, Table 13	3 .
8	Persons per household	County Reports, Table 13	3 _
t, u	Percentage of households sharing dwelling	County Reports, Table 13	3
v-x	Percentage of households at stated densities	County Reports, Table 18	3
y .	Persons per room	County Reports, Table 13	3
z-ad	Household arrangements	County Reports, Table 23	3
ae .	Percentage of households with 1 or 2 persons and containing persons of pensionable age	County Reports, Table 2	7
af	Percentage of households with more than one family	Household Composition Table 9.	ables,

### OTHER NOTES

### Sampling Variability

The percentages in columns b - d (socio-economic groups) and af (households containing more than one family) are based on 10 per cent sample figures and may therefore differ by chance from proportions based on a full count if these were available. Large differences are less likely than small ones and differences as large as or larger than any given size are more likely the smaller the number of persons or households on which they are based.

Where the percentages are based on small numbers they have therefore been printed with a warning as follows:-

Figure in italics	Standard error 10 per cent or more of the percentage, i.e., there is a chance of about 1 in 20 that the percentage based on a full count would be greater or less than the percentage shown by as much as 1/5 of that percentage.
Figure in italics in brackets	Standard error 25 per cent or more of the percentage, i.e., there is a chance of about 1 in 20 that the percentage based on a full count would be greater or less than the percentage shown by as much as half that

This is a warning that the limits of proportional chance variation are fairly wide. When a percentage is very small this may not be important; it may be enough to know that the percentage is nearly zero. But the warning is important when two percentages (however small) are being compared and conclusions drawn from their difference.

The formulae used to estimate the standard errors were:-

Let n be the number in the sample of occupied or retired males or of households as the case may be, p the proportion (per unit, not per cent) in a given socioeconomic group or household type, q = 1 - p, and s(p) the estimate of the standard error of p.

Then 
$$s(p) = \sqrt{\frac{pq}{n}}$$

and  $c = \sqrt{\frac{q}{np}}$  gives the standard error as a proportion of the sample proportion.

If two independent proportions  $p_1$  and  $p_2$  (e.g. column b for two different areas) are being compared,

$$s(p_1 - p_2) = \sqrt{s^2(p_1) + s^2(p_2)} = \sqrt{\frac{p_1 q_1}{n_1} + \frac{p_2 q_2}{n_2}} .$$

These formulae are approximate; they make no allowance for the fact that sampling was without replacement or for the actual sampling technique employed. More detailed information using computations from a sub-sample of the returns will be given in later census volumes.

The standard errors have to be estimated from the sample data and are therefore themselves subject to sampling variation. When the number in the sample belonging to the given socio-economic group or household type, np, is small, the estimate of the standard error therefore cannot be precise. This is especially important when the proportion p is near 100 per cent. E.g. suppose a small area in which there are 25 occupied or retired males of whom 2 are in the sample and both these are in the socio-economic groups grouped in column c. Then n = np = 2, the proportion in column c is p = 1 or  $100 \cdot 0$  per cent, q = 0 and s(p) = 0. The sample data indicate no variability at all in the sample estimate of the proportion  $(100 \cdot 0)$  per cent), but as these data are so few they can only do so very tentatively.

### Bias

Tests on the 10 per cent sample on which columns b to d and af have been based show that the sample was biased. The exact cause of this bias and the way in which it worked are still not known but it is already clear that the sample of households is biased. Although the total number of households in the sample is almost exactly one-tenth of the total number of households in the whole country the distribution of households by persons and numbers of rooms occupied is distorted. An indication of the amount of the bias for all households appears in the following table.

Percentage excess in 10 per cent sample when compared with one tenth of the full count figures

Persons		Nı	umber o	f rooms	occupi	ed		All
in the household	1	2	3-4	5	6	7-8	9 and over	house- holds
1	- 11	- 11	- 8	- 7	- 4	- 2	+ 10	- 8
2 - 6	- 7	- 3	+ 0	+ 1	+ 5	+ 9	+ 20	+ 2
7 and over	- 22	- 28	- 15	- 10	- 9	- 7	- 1	- 10
All households	- 10	- 6	- 1	+ 0	+ 3	+ 8	+ 17	+ 0

There is considerable under-representation of one-person households and of large households. For any stated size of household there is a clear gradient from under-representation of households occupying few rooms to over-representation of households occupying large numbers of rooms. It has not yet been possible to estimate the effect of this bias on the socio-economic group distribution in columns b to d nor the precise effect on the numbers of multifamily households which are the basis of column aft. Estimates of the effect of this bias will appear in the Occupation Tables with respect to the socio-economic group distribution and in the Household Composition Tables with respect to multi-family households.

### POST ENUMERATION SURVEY

In 1961 for the first time a post enumeration survey was taken in order to check the information collected at the census. A full description of the survey will be given in the general report on the census; in the explanatory notes to volumes of tables the post enumeration survey results will only be given where they give a warning of poor quality in figures appearing in the volume.

The items relevant to this table which were checked in the post enumeration survey were the total count of the number of buildings, the answers relating to household arrangements, socio-economic groups and household composition. The post enumeration survey did not indicate any significant error in the total numbers of buildings and households and in the distribution by socio-economic group. The analysis of the material on household composition has not yet been completed.

### Household Arrangements

### (i) Cold water tap

The post enumeration survey indicates that the number of households returned as being without a cold water tap is understated but it is not possible to give an accurate estimate of the degree of understatement due to the relatively small size of this group of households.

### (ii) Watercloset

The post enumeration survey indicates that the number of households returned as being without a watercloset is understated. Some ambiguity in the wording of the questionnaire used for the post enumeration survey means that the amount of understatement cannot be estimated precisely but it appears that for England and Wales the number of such households was at least 1.5 million compared with the number returned of 1,008,802. The sample used in the post enumeration survey was not large enough to permit reliable estimates to be made for smaller areas than England and Wales.

### Abbreviations

- A.C. Administrative County (the administrative county of London consists of the City of London (including the Inner and Middle Temples) and the metropolitan boroughs).
- C.B. County Borough.
- M.B. Municipal Borough.
- Met. B. Metropolitan Borough.
- U.D. Urban District.
- R.D. Rural District.

### Areas for which Statistics are given

### County Aggregates

Each county will have two aggregates; the total for all municipal boroughs and urban districts combined; and the total for all rural districts combined.

### Local Authority Areas

These are administrative counties, county boroughs, metropolitan boroughs, municipal boroughs, urban districts and rural districts.

### New Towns

Figures for New Towns relate to the areas as at Census day designated in Orders made under Section 1 of the New Towns Act, 1946, and in some cases amended by New Town (Designation) Variation Orders made in accordance with Sections 1 and 19 of the New Towns Act, 1946.

### Standard Regions

The constitution of the Standard Regions of England and Wales used in this volume is as follows:-

### Northern

Cumberland Durham Northumberland Westmorland Yorkshire North Riding

### East and West Ridings

Yorkshire East Riding Yorkshire West Riding

### North Western

Cheshire Derbyshire, Part of (1) Lancashire

North Midland Derbyshire, Part of (2) Leicestershire Lincolnshire Parts of Holland Parts of Kesteven Parts of Lindsey Northamptonshire Nottinghamshire Peterborough, Soke of Rutland

### Midland

Herefordshire Shropshire Staffordshire Warwickshire Worcestershire

### Eastern

Bedfordshire Cambridgeshire Ely, Isle of Essex, Part of (3) Hertfordshire, Part of (4) Huntingdonshire Norfolk Suffolk, East Suffolk, West

### London and South Eastern

Essex, Part of (5) Hertfordshire, Part of (6) Kent London A.C. Middlesex Surrey Sussex, East Sussex, West

### Southern

Berkshire Buckinghamshire Dorset, Part of (7) Hampshire Oxfordshire Wight, Isle of

### South Western

Cornwall Devon Dorset, Part of (8) Gloucestershire Somerset Wiltshire

### Wales I (South East)

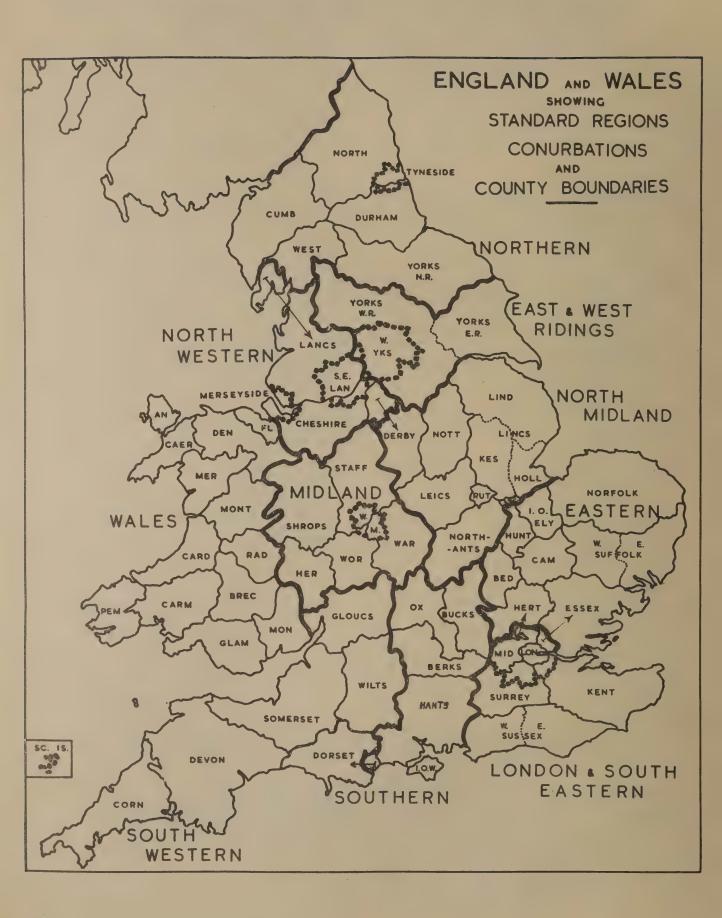

Breconshire Carmarthenshire Glamorgan Monmouthshire

### Wales II (Remainder)

Anglesey Caernarvonshire Cardiganshire Denbighshire Flintshire Merionethshire Montgomeryshire Pembrokeshire Radnorshire

### Urban and Rural Aggregates

These are aggregates of local authority areas grouped according to their type (all those within conurbations, urban areas, rural district); urban areas are also grouped according to the size of their resident population as estimated at Census Day (23rd April, 1961). "Urban areas" include boroughs and urban districts as defined under the Local Government Acts, and rural districts are also as defined by those Acts.

### Conurbation Centres

In each of the conurbations, apart from the West Yorkshire Conurbation, a central area has been identified. This central area has been defined as that containing the principal concentration of administrative and commercial offices, major shopping streets, theatres, cinemas and dance halls, public buildings, hotels, special areas and precincts (e.g. university, cathedral and legal) and main railway and coach termini. It is characterised by relatively low residential population, by a large concentration of employment, involving journey to work, and often by traffic congestion and car parking problems. The areas corresponding to this definition have been specified in consultation with the Ministry of Housing and Local Government, the local planning authorities and interested university departments.

An approximation to conurbation centres is as indicated below:-

### Greater London

The whole of the City of London and of Finsbury Met. B., Holborn Met. B. and Westminster Met. B. and parts of the following Met. Bs.

Bermondsey Met. B. Saints Ward

Chelsea Met. B. Parts of Hans Town and Royal Hospital Wards

Parts of the Abercromby, Central and Merseyside

St. James Wards of Liverpool C.B.

Tumeside Parts of the Jesmond, St. Nicholas,

Stephenson and Westgate Wards of Newcastle

upon Tyne C.B.

Parts of the Deritend, Duddeston, Edgbaston, Ladywood, Market Hall and St. Paul's Wards West Midlands

of Birmingham C.B.

A map is included in each relevant County Report.

### Presentation Conventions

A blank indicates that a particular combination of line and column is impossible or would contain a derived figure such as a rate which has not been calculated.

The symbol - indicates zero.

The symbol O indicates less than one half of a unit but not zero.

### Census Schedule

A copy of the census schedule E.90 is included opposite page xviii.

### Мар

An outline map showing the boundaries of Standard Regions, Conurbations and Counties is included on page xvi.

### CENSUS, ENGLAND, 1961 E. 90

### SCHEDULE

Prescribed by Regulations under the Census Act, 1920, as the form to be used for approximately nine tenths of the population in England (excluding Monmouth-shire), for the purpose of returns in respect of (a) Private Households, and (b) Other persons in respect of whom no other form of schedule is prescribed.

### NOTICE

1. The Head, or person acting as Head, of a private Household is required by law to make a return in this form in respect of all persons (members of the household, including visitors, employees and boarders) who are present at midnight on the night of Sunday, 23rd April, 1961, in the dwelling, and all persons who arrive at the dwelling and join the household on Monday, 24th April, 1961, before the collection of the schedule, and who have not been enumerated elsewhere.

Note.—Any one or more persons separately occupying a house or part of a house, flat, apartment, etc., will be regarded as a separate household for Census purposes. Persons who usually have at least one meal a day provided by the household while in residence will be regarded as part of the household.

- 2. Every person is required by law to give to the person responsible for making the return such information as may be necessary to enable the return to be made. No use may, however, be made of such information by the person to whom it is given except for the purpose of making the return.
- 3. A person who has applied in the prescribed manner to make a separate confidential return will not be liable to give information to the Head; and in such case the person responsible for making the return will only be liable to include in his return in respect of that person the particulars required in Columns A and B within.
- 4. The schedule will be called for on MONDAY, 24th APRIL, by the appointed enumerator; in order that he may not be delayed it must be ready with the answers written in the proper columns early on the morning of that day. If the answers appear to be incomplete or inaccurate, the enumerator must ask any questions necessary to enable him to correct the schedule.
- 5. The person responsible for making the return may, if unable to deliver the schedule to the enumerator personally, arrange for some other person to do so on his behalf. If desired, the schedule may be handed to the enumerator under cover.
- 6. If any person whose duty it is to make a return or to give information refuses to do so, or wilfully gives false information, or uses otherwise than for the purpose of making the return any information given him for that purpose, he will be liable to a fine not exceeding Ten Pounds.
- 7. The contents of the schedule are strictly confidential.

E. M. T. FIRTH,

Registrar General.

### NOTES

### CONFIDENTIALITY.

No information about any individual person, family or dwelling, will be given to anyone not employed on the Census

### I. Names and Surnames (Column A)

- (a) Names are wanted only to help in taking the Census.
  (b) Write first the name of the head of the household (if present) or acting head and then the names of relatives, visitors, boarders, employees, etc.
- (c) If a husband and wife are both present on Census Night write their names on consecutive lines.

### 2. Usual Address. (Column C)

- (a) School Children, Students, etc., who live away from home during term should give their home address, not their term-time
- (b) Members of H.M. Forces should give the address of their married quarters or other home address.
- (c) Resident Staff should regard the private house, boarding house, or other premises where they live as their usual address.
- (d) For persons with no settled address write "None".
- (e) For boarders who have a settled residence with this household

### 3. Age. (Column D)

- (a) If the age is not known exactly, give it as accurately as possible.
- (b) Even where the birthday is only a few days after Census day, the required age is the number of years at the last birthday and II
- (c) For babies under one month old write "Under I month"

### 4. Marriage, etc. (Column E)

If a person is legally separated, not divorced, write "Married".

### 5. Children. (Column F)

Include in the number of children born alive to the mother in marriage, any children of a previous marriage and any that have died.

### 6. End of first marriage. (Column H)

Write at (ii) the date of her first or only husband's death or date of divorce.

### 7. Country of Birth. (Column J)

For the purposes of the Census, persons born in Monmouthshire should

### 8. Citizenship or Nationality. (Column K)

- (a) For citizens of the Irish Republic write "Irish".
- (b) For British protected persons give the protectorate or trust
- territory, e.g. Uganda, Tanganyika.

### 9. Ownership and Renting. (Panel L)

- Leaseholds. If the household occupy their house, flat, etc. on a lease which was originally granted for more than 21 years, or has since been extended for more than 21 years, write "Yes" at (a). For shorter leases answer one of the other parts of the question in
- By virtue of Employment. If the accommodation is provided in connection with the employment of a member of the household and ceases to be provided after the employment comes to an end (e.g. a tied cottage, caretaker's flat) write "Yes" at (c) whether rent is paid

### 10. Household Arrangements. (Panel M)

- (a) Cold water tap. This refers to a tap within the building. It does not include a tap in an open yard or a public standpipe. If only the latter are available, the answer "None" should be given.
- (b) Hot water tap. This means water piped to any form of heating appliance which will allow hot water to be drawn from a tap within the building, e.g. a boiler, tank with immersion heater, geyser, or sink heater
- (c) Fixed bath. This means a bath permanently installed with a waste pipe leading outside the building. It does not matter for this purpose whether there is water piped to it or whether the room where it s installed is used only as a bathroom or not.
- (d) Watercloset. This means any watercloset emptying into a main sewer, septic tank or cesspool. It does not include a chemical closet or earth closet. It must be within the building or attached
- e.g., For a household which shares the use of a fixed bath and watercloset, and has the sole use of the cold water supply but has no hot water supply the entries would be:--
  - (a) Cold water tap-Sole use.
  - (b) Hot water tap-None.
- (c) Fixed bath-Shared (d) Watercloset-Shared.

### BEFORE YOU ANSWER EACH QUESTION PLEASE READ CAREFULLY THE COLUMN HEADING AND THE NOTES FOR THAT COLUMN AND THE EXAMPLES ON THE BACK OF THIS FORM.

### PLEASE WRITE IN INK.

### STRICTLY CONFIDENTIAL

Include in this schedule all pers the night in this household. her also.  Write in this column the names and surnames of all the persons to be included before you go on to the other columns. See Note 1.  Babies should be included. If they have not been given a name, write "Baby" and the surname.	Relationship to the head of the household.  e.g. Head, Wife, Son, Visitor,	If this dwelling is the person's usual address, write "Here";  if not write the more usual address in full.	Sex "M" or "F" and Age in years at last birthday and completed months since then. See Note 3.	Persons 16 years or over. Write "Single", "Married", "Widowed"	All married, widowed or divorced women.  Write at (i) the total number of children born alive to her in marriage.  See Note 5.  Were any of these children born after 23rd April, 1960? Write "Yes" or "No" at (ii).	All married women.  Write at (i) the date of her present marriage.  Has she been married more than once? Write "Yes" or "No" at (ii).  If "Yes" fill in column H.	Widowed or divorced women; OR women married more than once.  Write at (i) the date of first or only marriage.  Write at (ii) the date when that marriage ended. See Note 6.	Country of birth  If born in Great Britain write "England", "Scotland", or "Wales", whichever applies. See Note 7.  If born in Ireland write "Northern Ireland" or "Irish Republic".  If born elsewhere give the country of birth, e.g. Trinidad, Poland, or write "At Sea".	For persons NOT born in Great Britain or Northern Ireland See Note 8.  (a) If a citizen of the Commonwealth state at (i) citizenship, e.g. United Kingdom and Colonies, Indian, Canadian. # England and Wales, Regions, Conurbations, Urban/Rural Aggregates, Local Authority Areas, Conurbation Centres, New Towns

Characteristics of Households and Dwellings in Local Areas Table 26

Notes:- (1) For definitions of the terms used in the column headings and of the various types of area see pp. vii to xi and xiv to xviii.

2) Columns b to d are based on 10 per cent sample figures of the population resident in each area.

3) Columns b to d are based on a 10 per cent sample.

4) Percentages in columns b to d and af based on small numbers and therefore particularly liable to chance errors are printed in italics. See page xii.

5) Columns i to af are restricted to households of which a less now member was present at Census.

6) Columns i to af are restricted to households of which a less not member is present at Census.

6) The reas where members of schools and universities in private loggings are important the figures of population that of 1964 in term-time. In the vacation but that of 1964 in term-time.

6) Rightes for the 1951 population in private households and dwellings in Conurbation Gentres are not available. No rates can therefore be shown for these areas in columns f and h.
